DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(f) he did not himself invent the subject matter sought to be patented.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 55 and 57 are rejected under 35 U.S.C. 102(e) as being anticipated by Fermann et al (5,818,630).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 55, Fermann discloses a method of generating ultra short optical pulse comprising, circulating light energy within a laser cavity (See Figure 1) amplifying said light energy within said laser cavity in a bent multimode fiber Figure 1, Character 12, (abstract, Column 4, lines 33 – 45, and confining said light energy within said laser cavity substantially to the fundamental mode of said multimode fiber (Figure 1, Character 12) .

Regarding claim 57, Fermann discloses a mode filter (see Figure 7, Character 70, Column 4, Lines 66 – 67, Column 5, Lines 1 – 2 and Column 11, Lines 40 – 50).

Allowable Subject Matter

Claims 1 – 50 and 58 are allowed.

Claim 56 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 11/09/2005 have been fully considered but they are not persuasive. Applicant argues that the US 5,818,630 is not a prior art since it claims priority over 11 /25/1998, however, the US 5,818,630 used for rejection was filed on June 25, 1997 one year prior to the priority date. For the reasons stated above, the 35 U.S.C. 102 (e) rejection stands and is considered proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
